

## EXPERIENCE

---

- **Bloomberg LP** London, United Kingdom  
*Senior Software Engineer* 2019 - Present
  - **Taxonomy and Metadata System:** Infrastructure team developing a taxonomy and metadata system to support various asset classes at Bloomberg. Python, GraphQL, Redis, RabbitMQ, Solr, RDF, PostgreSQL, Data Pipeline
    - \* **Architect of various ingestion pipelines** that handle ingestion of metadata for datasets such as commodity index tickers.
    - \* Added **support for sharding** to increase the speed of the ingestion pipeline. Split up the initial ingestion into 8 shards that are running distributed across an entire cluster.
    - \* Implemented node overlay and concatenation executed on RDF graphs.
    - \* Worked on **rearchitecting the ingestion pipeline** from a synchronous pipeline to a file based ingestion.
    - \* Migrated the codebase from Python 2 to Python 3 **decreasing the overall response time of services by 15%**
    - \* Implemented services in GraphQL to avoid overfetching and underfetching on the existing Bloomberg specific microservice framework.
    - \* Leading **intergration of the metadata system with timeseries datasets**, a company wide effort to support non-tickerized data.
    - \* Working on a side project, debugging tool, to help find metadata for given entities regardless of the source of provenience, using a **topological sort algorithm on service APIs and RDF Graphs**.
    - \* Leading the **research into adoption of triplestores** at Bloomberg, an effort across 6 departments towards choosing the right solution to cover the usecases presented at Bloomberg. Actively researching into solutions such as Virtuoso or TerminusDB.
    - \* Organizing weekly department-wide design discussions, to share knowledge regarding ongoing work.
    - \* Team lead backup for a team of 7 engineers.
- **Bloomberg LP** London, United Kingdom  
*Software Engineer* 2016 - 2019
  - **Real Time Analytics:** Application team, maintaining a large variety of analytics, integrated in different products across Bloomberg. Processing several billion trades per day. C++, Distributed, Realtime
    - \* Implemented Average Volume at Time for non equities and Top Exchanges in the past X minutes.
    - \* Implemented a **load testing facility** that is used to simulate the impact of market open on the system to assess performance and capacity. I identified a bottleneck in the system and by fixing it, subscriptions are being processed 3 times faster.
    - \* **Increased availability** of an analytic by implementing fallback to disk in case the database connection cannot be established. This prevents the 1 minute downtime per week when the database cluster is being rebooted.
  - **Recommendation Disclosures and Trade Ideas:** Python, Typescript, Microservices, Event Sourcing
    - \* Implemented asynchronous messaging using RabbitMQ to allow distribution of recommendations. Added support to publish messages, implemented consumers and set up the middleware.
    - \* Reduced the codebase by 8% by removing around 100.000 lines of dead or unused code.

## PERSONAL PROJECTS

---

- **Cryptocurrency analysis** <https://github.com/erikseulean/cryptoscraping>: (January 2018) Scraped cryptocurrency data from different sources and created a library that allows to easily analyse prices, market cap and volume. I implemented and plotted the Ichimoku indicator and created correlation plots between google trends and different cryptocurrencies. Python: Numpy, Pandas, Matplotlib, Multiprocessing, Jupyter
- **ColorBlocks**: (November 2015) Awarded 2nd prize competing against 12 teams at HackTM, the largest Hackathon in Eastern Europe lasting 50 hours straight. I was part of a team of three and we developed a cross-platform puzzle game for mobile and tablet devices. Available on Google Play as ColorBlocks. LUA
- **Cycling Community Platform**: (October 2012) Awarded 2nd prize competing against 20 teams in Microsoft Excite, three week competition. Developed a mobile and web based platform for the local cycling community. I was part of a team of three students. C#.NET, Javascript, SQL

## EDUCATION

---

- **Politechnica University of Timisoara** Timisoara, Romania  
*B.S.E in Computer Science* July, 2014
  - **Modules:** Software Engineering, Computer Architecture, Algorithms, Software Development Fundamentals, Design Patterns, Programming Languages, Databases
- **University of Sheffield** Remote, United Kingdom  
*Graduate Certificate in Statistics* *First-Class Honours*
  - **Modules:** Mathematical Methods for Statistics, Probability and Probability Distributions, Basic Statistics
- **University of Sheffield** Remote, United Kingdom  
*Graduate Certificate in Statistics* *First-Class Honours*
  - **Modules:** Mathematical Methods for Statistics, Probability and Probability Distributions, Basic Statistics
